

AMENDMENT NO. 3 TO MASTER SUBSCRIPTION AGREEMENT

Archstone Software, Inc. and Vandelay Industries, Inc.

AMENDMENT NO. 3 TO MASTER SUBSCRIPTION AGREEMENT NO. ARC-MSA-2018-0142

This Amendment No. 3 (this “Amendment”) is entered into as of September 10, 2025 (the “Amendment Effective Date”) by and between **Archstone Software, Inc.** (“Archstone”) and **Vandelay Industries, Inc.** (“Customer”) and further amends the Master Subscription Agreement between the Parties dated March 1, 2018, as amended by Amendment No. 1 dated February 15, 2021 and Amendment No. 2 dated January 22, 2024 (together, the “Agreement”). Capitalized terms not defined in this Amendment have the meanings given in the Agreement.

RECITALS

A. Archstone has developed generative artificial intelligence features for the Services, marketed as Insight AI, and wishes to make them available to a limited group of Customer’s Service Users on a pilot basis before general release.

B. Customer is willing to participate in the pilot on the terms below, including terms governing Archstone’s use of Customer Data in connection with Insight AI.

C. On August 8, 2025, Archstone gave Customer written notice under Section 10.3 of the Agreement that Archstone Holdings, LLC, an affiliate of Greyfell Capital Partners, acquired all of the outstanding equity of Archstone on August 1, 2025, and that Archstone Software, Inc. continues as the contracting entity with all obligations under the Agreement unchanged. Customer acknowledges receipt of that notice.

The Parties therefore agree as follows.

1. Insight AI Pilot

1.1 Scope. Archstone shall make the Insight AI features described in Schedule 1 (the “Pilot Features”) available to up to fifty (50) Service Users designated by Customer (the “Pilot Users”) from October 1, 2025 through the end of the Third Term (the “Pilot Period”), at no additional charge.

1.2 Designation. Customer’s administrators may designate and change Pilot Users through the administrator console. Customer shall not designate Service Users located outside the United States, the United Kingdom, and Ireland as Pilot Users during the Pilot Period.

1.3 Pilot Status. The Pilot Features are provided as pre-release functionality. Section 8.2(a) of the Agreement does not apply to the Pilot Features during the Pilot Period. Archstone may modify or withdraw Pilot Features on fifteen (15) days' notice. Customer may withdraw from the pilot at any time on written notice, and Archstone shall disable the Pilot Features for Customer's tenant within five (5) business days.

1.4 Feedback. Customer shall use reasonable efforts to provide feedback on the Pilot Features through Archstone's pilot feedback channel and to participate in up to three (3) one-hour feedback sessions during the Pilot Period. Section 3.4 of the Agreement applies to such feedback.

2. Use of Customer Data for Insight AI

2.1 Pilot Content. "Pilot Content" means Customer Data that Pilot Users submit to, or that is retrieved by, the Pilot Features, together with the prompts entered and outputs generated.

2.2 Permitted Use. Archstone shall use Pilot Content solely (a) to provide the Pilot Features to Customer, and (b) to configure and tune retrieval and ranking components of Insight AI deployed exclusively within Customer's tenant. Any such tuning artifacts are Customer Data.

2.3 Prohibited Use. Archstone shall not use Pilot Content or any other Customer Data to train, fine-tune, or improve any machine learning or language model that is made available to any person other than Customer.

2.4 Model Providers. The Pilot Features use large language models operated by the third-party providers identified in Schedule 1, which are Subprocessors for purposes of Exhibit C. Archstone represents that its agreements with those providers prohibit the providers from retaining Pilot Content beyond the duration of a request, from using Pilot Content to train their models, and from disclosing Pilot Content to third parties.

2.5 Outputs. As between the Parties, outputs generated by the Pilot Features from Customer Data are Customer Data. Archstone makes no representation as to the accuracy of outputs, and Customer is responsible for reviewing outputs before relying on them.

2.6 Logging. Archstone shall retain prompt and output logs for Customer's tenant for no longer than thirty (30) days, for the purposes of abuse detection and support, after which they are deleted.

3. Included Storage

In consideration of Customer's participation in the pilot and its feedback obligations under Section 1.4, Included Storage under Order Form No. 3 is increased from 5 TB (5,120 GB) to 6 TB (6,144 GB) effective September 1, 2025, for the remainder of the

Third Term, at no additional charge. Item 2 of Order Form No. 3 (storage overage) is unchanged.

4. General

4.1 Nothing in this Amendment changes the Third Term, the Subscription Fees, the Renewal Term duration, or the notice provisions of the Agreement as amended by Amendment No. 2.

4.2 Except as expressly amended by this Amendment, the Agreement remains in full force and effect. In the event of conflict between this Amendment and the Agreement, Amendment No. 1, or Amendment No. 2, this Amendment controls with respect to the Pilot Features and Pilot Content only.

4.3 This Amendment may be executed in counterparts and by electronic signature.

IN WITNESS WHEREOF, the Parties have executed this Amendment as of the Amendment Effective Date.

SCHEDULE 1: INSIGHT AI PILOT FEATURES

Feature	Description	Model provider
Document Summary	Generates a summary of a selected document or workspace, with citations to source passages	Cortexa Labs (US region)
Ask the Workspace	Natural-language question answering over the documents in a workspace the Pilot User can access	Cortexa Labs (US region)
Drafting Assist	Suggests clause language based on documents the Pilot User selects as precedents	Cortexa Labs (US region)
Filing Suggestions	Improves Archstone Mail	Archstone (in-tenant)

(enhanced)

predictive filing using
workspace context

Data flow: Pilot Content is transmitted from Customer's Repository to the model provider's US-region endpoint over encrypted channels for the duration of each request and is not persisted by the provider. Archstone's Subprocessor List is updated to include Cortexa Labs, Inc. as of October 1, 2025.

Access: Pilot Features respect all workspace permissions and ethical walls. A Pilot User cannot retrieve content through Insight AI that the Pilot User could not otherwise open.

End of Schedule 1.
