

# SOC 2 Type II Bridge Letter

## Archstone Software, Inc.

### **ARCHSTONE SOFTWARE, INC.**

1700 Lincoln Street, Suite 2400 · Denver, Colorado 80203

February 14, 2025

To: Customers and prospective customers of Archstone Software, Inc.

### **Re: Bridge Letter for the period October 1, 2024 through February 14, 2025**

Archstone Software, Inc. ("Archstone") most recently obtained an independent Service Organization Control (SOC) 2 Type II report on the description of its Archstone DMS system and the suitability of the design and operating effectiveness of its controls relevant to the Security, Availability, and Confidentiality trust services categories, for the period **October 1, 2023 through September 30, 2024** (the "Report"). The Report was issued on December 12, 2024 by Halvorsen & Reid LLP, an independent certified public accounting firm, and expressed an unqualified opinion.

The purpose of this letter is to provide customers with assurance for the period between the end of the Report's examination period and the date of this letter (the "Bridge Period").

To the best of Archstone's knowledge, for the Bridge Period:

1. There have been no material changes to the system described in the Report, including its infrastructure, software, people, procedures, or data, that would materially affect the conclusions in the Report.
2. The controls described in the Report have continued to operate as designed, and Archstone is not aware of any control failures that would materially affect the conclusions in the Report.
3. No security incidents occurred during the Bridge Period that resulted in unauthorized access to or disclosure of customer data.

Archstone's next SOC 2 Type II examination is scheduled to cover the period October 1, 2024 through September 30, 2025, with the report expected in December 2025.

This letter is provided for the information of Archstone's customers and their auditors and is not a substitute for the Report. It should be read in conjunction with the Report, which is available under non-disclosure agreement from your Archstone account manager.

Sincerely,

/s/ Elena Roux  
Elena Roux

Chief Information Security Officer  
Archstone Software, Inc.

*Vandelay Legal Technology file note (S. Pellegrini, 2026-09-03): This is the most recent SOC 2 document in our vendor file. The December 2025 report referenced above was not delivered under Exhibit C, Section 7. Requested from D. Okafor on 2026-04-14 and again on 2026-07-21; account team indicated the examination was "delayed by the integration with Greyfell portfolio security tooling." No bridge letter has been received for any period after February 14, 2025.*
