

Hooli Docs for Legal

Solution Overview for Vandelay Industries Legal Department · September 2026

HOOLI WORKSPACE · HOOLI DOCS FOR LEGAL

Prepared for: Sofia Pellegrini, Legal Technology Manager, Vandelay Industries
Prepared by: Grant Ellery, Enterprise Account Director, Hooli, at the request of
Vandelay Corporate IT Date: September 5, 2026

Why Vandelay is already most of the way there

Vandelay licenses Hooli Workspace Enterprise for all 22,000 employees. Hooli Docs for Legal is a module of that suite. Your identity, security policies, retention labels, device management, and Teams-equivalent collaboration are already in place. Adding legal-grade document management means turning on a module, not standing up a platform.

What Hooli Docs for Legal provides

- **Matter-centric workspaces** with templated folder structures, metadata inheritance, and cross-matter search.
- **Email filing** from Hooli Mail and Microsoft Outlook, with suggested filing based on matter context.
- **Ethical walls and access governance** built on Workspace groups and sensitivity labels, administered by IT and Legal jointly.
- **Hooli Assist** generative features (summaries, drafting from precedents, cross-document comparison) included in the module, operating under the Hooli Workspace Enterprise data terms Vandelay has already negotiated: no training on customer content, tenant-scoped processing, EU data residency available.
- **Certified connectors** for LedgerLine Matters, Inkwel eSign, and Lumen Discovery. Covenant CLM integration would be delivered through the Hooli Integration Framework as a professional services engagement.
- **Governance and retention** through Hooli Records, which can replace third-party retention tooling over time.

Commercial summary

Item	Detail
Incremental price under Vandelay's Enterprise Agreement	\$22.00 per user per month (standalone list: \$68.00)
240 users, annual	\$63,360
Storage	10 TB included in the Legal module; overage \$0.40 per GB per month
Migration professional services (estimate,	\$180,000 to \$240,000

5 to 10 TB, matter model design,
permissions mapping)

Integration rebuild (Covenant CLM,
RetainIQ equivalents)

Timeline

Contract vehicle

Included in migration estimate at the
upper end

12 to 18 months, phased by practice
group

Amendment to Vandelay's existing Hooli
Workspace Enterprise Agreement (owned
by Corporate IT); co-terminous with the
enterprise renewal in 2028

What to know

- Hooli Docs for Legal is a suite module. Legal-specific features are prioritized on the Workspace roadmap alongside other business units.
- Migration from Archstone is a services-led project. Hooli's professional services team has completed nine legal DMS migrations from established platforms in the last 24 months.
- Because the module sits inside the enterprise agreement, pricing, terms, and renewal timing are governed by Vandelay's corporate relationship with Hooli rather than by a Legal Department contract.

Hooli Workspace and Hooli Docs are products of Hooli. Prepared at the request of Vandelay Corporate IT for discussion purposes; not an offer.
