

Pied Piper Vault

Solution Overview for Vandelay Industries Legal Department · September 2026

PIED PIPER, INC. · PIED PIPER VAULT

Prepared for: Theo Sinclair, Director, Legal Operations, Vandelay Industries Prepared by: Monica Hall-Reyes, Director of Enterprise Sales, Pied Piper, Inc. Date: September 4, 2026

Built for how legal teams work now

Pied Piper Vault is a cloud-native document management platform for legal departments, designed in the last decade with AI in the architecture rather than attached to it. Our customers move to Vault because it is fast, because it is simple enough that new joiners are productive in a week, and because our migration engine makes leaving an established platform a project measured in months, not years.

Platform highlights

- **Speed and interface.** Sub-second search across a 10 TB repository from any region; a single interface for web, Outlook, and mobile.
- **Matter-centric by default,** with automatic workspace creation from your matter management system.
- **Vault AI** (optional add-on): summaries with citations, question answering across matters, clause comparison, and drafting from your own precedents. Customer content is never used to train shared models; processing is tenant-scoped; model providers are disclosed and contractually barred from retention.
- **Middle-out migration engine.** Automated extraction from established platforms including Archstone DMS, preserving folder structure, metadata, version history, and permissions, with validation reports at each stage.
- **Certified connectors** for Inkwell eSign and Lumen Discovery. LedgerLine Matters connector in beta (general availability Q4 2026). Covenant CLM connector on the roadmap for H1 2027; interim integration via Vault's open API.
- **Security.** SOC 2 Type II (report period ending June 2026, report issued August 2026); ISO 27001 certification audit in progress, expected Q1 2027; US and EU hosting regions.

Commercial summary

Item	Detail
Vault base	\$41.00 per user per month
Vault AI add-on	\$18.00 per user per month (10 percent discount on three-year terms)

240 users, annual, base only	\$118,080
240 users, annual, with Vault AI	\$169,920
Storage	8 TB included; overage \$0.45 per GB per month
Migration professional services (estimate, from Archstone, 5 to 10 TB)	\$90,000 to \$120,000, including migration engine and validation
Integration rebuild (Covenant CLM, RetainIQ equivalents)	Not included; Vault API and partner services available
Timeline	6 to 9 months
Contract terms	Three-year term; 90-day notice; 3 percent annual cap; monthly availability measurement with automatic credits; tenant-scoped AI terms standard
